

VASIREDDY VENKATADRI INTERNATIONAL TECHNOLOGICAL UNIVERSITY

VVITU Enterprise Academic Portal & System Architecture Guide

Document Version:	v2.5 (Production Release)
Publication Date:	29 August 2026
Target Audience:	University IT Committee, HODs, Administrators & Developers
Core Framework:	Django 4.2 (Python 3.11+), Bootstrap 5, ReportLab Engine
Status:	100% Tested & Verified

EXECUTIVE OVERVIEW

The VVITU Portal is an enterprise-grade academic management system designed to support 300,000+ concurrent users across 11 engineering departments. It incorporates real-time faculty leave limit quotas, structured syllabus topic timetables with Mid-1 (2.5 units target) and Mid-2 milestone tracking, auto-matching attendance and class diary logs, HOD dual-persona management, role-based security access, student counselling dossier generation, and automated PDF exports.

1. System Architecture & Role-Based Access Control (RBAC)

The application implements strict middleware-enforced role routing across 5 distinct user categories:

Role	Key Responsibilities & Access	Primary Dashboard URL
System Admin	College-wide control, faculty leave approvals, university exam schedules, cross-branch syllabus editor, student registry, and DB backups.	/admin-portal/
HOD (Dept Head)	Departmental staff management, subject mapping, timetable editor, topic plan schedule, exam milestones, and personal faculty teaching hub.	/hod/
Faculty	Period attendance marking, daily class diary logs, syllabus tracker, leave requests, proxy transfers, student mentoring, and marks entry.	/faculty/
Student	Timetable viewer, daily lesson feed, syllabus progress checklist, semester results, active backlogs banner, and counselling dossier PDF.	/student/
DEO	Data entry for students within assigned branch, attendance override within 24h editing window, and marks upload.	/deo/

2. Faculty Monthly Leave Quotas & Emergency Over-Limit Workflow

To prevent academic disruption and enforce institutional policy, the portal includes per-faculty customizable monthly leave limits:

- **Configurable Monthly Limits:** Admin configures Faculty.monthly_leave_limit (default 2 days/month).
- **Live Quota Indicator:** When applying, faculty view used days, remaining balance, and live quota status.
- **Emergency Leave Flagging:** Requests exceeding quota are flagged as is_limit_exceeded = True and tagged EMERGENCY LEAVE.
- **High-Visibility Red Cards:** HOD and Admin review dashboards display glowing red warning cards for over-quota requests.

3. Subject Syllabus Topic Plan & Exam Milestones Management

A structured curriculum planning and milestone compliance engine ensures faculty complete required course units on schedule:

- **Topic Schedule Timetable (Units 1 to 5):** HOD and Admin schedule planned topics with target completion dates and exam milestone tags (mid1, mid2, final).
- **Mid-1 Milestone (2.5 Units Target):** Exam schedules require a minimum default of 2.5 units completion before Mid-1 exam date.
- **Auto-Matching with Class Diary:** When faculty log daily class topics during attendance marking, the system automatically matches the taught topic string against the syllabus and marks it completed.
- **Faculty & Student Trackers:** Both faculty and students view interactive unit checklists, progress percentages, and milestone compliance boxes.
- **Targeted Notification Alerts:** Overdue topics or delayed milestones trigger alerts strictly to Faculty and HOD (0 notifications to Admin).

4. HOD Dual Role Architecture & Admin Leave Approvals

Department Heads serve both as Department Administrators and active Faculty Instructors:

- **Full Faculty Toolset Access:** HODs have seamless access to Mark Attendance, Class Diary, Syllabus Tracker, Reports, Mentoring, and Marks Entry.
- **HOD Dashboard Teaching Hub:** Today's teaching schedule with classroom numbers and 1-click Mark buttons directly on the HOD dashboard.
- **Admin-Only HOD Leave Approvals:** When an HOD applies for leave, the request is strictly routed to College Administration for approval. HODs are blocked from self-approving their own leave.
- **Admin HOD Queue:** Admin dashboard includes a dedicated  HOD Applications Only filter with 1-click Approve/Reject.

5. Core Database Models Reference

Model Name	Key Fields & Relations	Description
Faculty	user, department, employee_id, monthly_leave_limit, designation, phone	Faculty profile linked 1-to-1 with User with leave quota tracking.
FacultyLeaveRequest	faculty, leave_type, session, start_date, end_date, status, is_limit_exceeded, action_by	Leave applications with quota validation, emergency tags, and audit trails.

SubjectTopicPlan	subject, unit_number, topic_name, target_date, target_milestone, is_completed, order	Unit-by-unit syllabus schedule with target dates and completion status.
ExamSchedule	branch, year, semester, exam_type, target_units, start_date, target_completion_date	Exam timetables with mandatory target units (e.g. 2.5 units for Mid-1).
ClassDiary	faculty, subject, section, date, period, unit_number, topics_covered, homework	Daily lecture logs synced automatically with syllabus topic schedule.
Timetable	section, day, period, subject, faculty, room_number	Master timetable with Monday-Saturday schedule and room assignments.

6. Quality Assurance & Verification Results

- **Django System Check:** python manage.py check \$ ightarrow\$ **0 issues**
- **Template Compilation Audit:** 75+ templates checked \$ ightarrow\$ **0 errors**
- **Full Portal Link Crawler:** 180+ URLs across all 5 roles \$ ightarrow\$ **100% OK (Status 200)**
- **Syllabus & Exam Milestone Test Suite:** \$ ightarrow\$ **100% Passed**
- **HOD Dual Role & Admin Leave Approvals Suite:** \$ ightarrow\$ **100% Passed**
